

ReWild – Products and Services Pricing 2025

- **Soil or Compost Microbiology Analysis, \$120/sample or \$100/sample for 3+**

Includes:

- Number of active bacteria, fungi, protists, nematodes,
- Fungal to Bacterial Ratio (F:B),
- Interpretation of relative proportions of detrimental versus beneficial microbes and
- Notes of texture, odour, colour and other general observations.
- May add standard nutrient analysis to complete the picture of soil health for an additional charge.

- **Compost Tea or Extract, \$50/8L or \$80/16L**

- Made with Colleen's high quality, thermal-aerobic compost, which is monitored regularly. All microbial products are quality-controlled under a microscope.
 - At a 20gal/acre application rate, 5gal (19L) treats 0.2 acres (800m²).
 - 1L treats 200m², or 45ft by 45ft.
- Larger volumes available upon request

- **Farm Compost, \$100/yard (not including delivery)**

- Made using a windrow turner, wood chips, softwood shavings, horse manure and more
- Completed thermal aerobic process: minimum of 3 turns during active thermal stage.

- **Colleen's Compost, \$6/L**

- Meticulously crafted using diverse and clean ingredients, achieving Dr. Ingham's standards for thermal aerobic compost, monitored under the microscope to guarantee the presence of a complete soil food web. Achieving high numbers of beneficial fungi, protozoa and nematodes.
- Reserved for compost teas and extracts.

- **5 gallon Compost Tea Brew Kits, \$200**

- We manufacture the 5 gallon mini-microbulator airlift-brewer by Tim Wilson. This design is microbe-tested and produces the best compost teas according to Dr. Elaine Ingham herself.
- Kit refills include 1L of premium compost blend and organic, high-quality ingredients (microscope-tested recipes, customizable). \$15/refill.

- **25 gallon Compost Tea Brew Kit, \$530**

- The upsized airlift Microbulator by Tim Wilson, includes 30gallon pail, larger air pump, manifold, compost tea bag and 1 kit refill. 20gal treats 1 acre.
- Kit refill includes 3L of premium compost blend, and organic, high-quality ingredients (microscope-tested recipes, customizable). \$30/refill.

- **Soil Health Consultation, \$80/hr, or \$20/15min**

- Site visit(s), Sample collection,
- Microbiology and/or nutrient testing and interpretation,
- Creation of a soil restoration plan,
- Help developing your own compost/tea/extracts,
- Presentations/outreach.
